Professional Summary (Backend Developer)

Diligent Backend Developer with extensive hands-on experience in Python, Django and SQL. Proficient in developing robust backend systems and web applications, with a demonstrated history of delivering functional and efficient code. Eager to contribute enthusiasm, adaptability, and a fresh perspective to a dynamic team.

Experience

Independent Project

Chat Application Developer

July 2024

- Developed a real-time web chat application using Python, Django, HTML, CSS, and JavaScript.
- Created a user authentication system for simple login functionality.
- Implemented real-time messaging features with timestamped messages, unread message count, and display of the latest message.
- Demonstrated advanced Django skills through efficient backend development and integration with frontend technologies.

Independent Project

Pediatric Calculator App Developer

April 2024

- Designed and developed a pediatric calculator mobile application using Python, Pandas, and Flet.
- Implemented features to calculate height-for-age, weight-for-height, and weight-for-age for children up to 18 years old.
- Collaborated with pediatricians to ensure the app met clinical requirements, leading to daily usage by medical professionals.
- Enhanced app performance and user interface based on feedback, improving overall user experience.

Certifications/Courses

Python and SQL (Intermediate Level)

SoloLearn

Demonstrated theoretical and practical understanding of Python and SQL through course completion.

Introduction to Web Development with Django

Udemy

Completed a comprehensive course covering Django fundamentals and web development best practices.
