Professional Summary (Backend Developer)

Diligent Backend Developer with extensive hands-on experience in Python, Django and SQL. Proficient in developing robust backend systems and web applications, with a demonstrated history of delivering functional and efficient code. Eager to contribute enthusiasm, adaptability, and a fresh perspective to a dynamic team.

Skills

- **Backend Development:** Python, Django, Django REST Framework, Celery
- **Web Technologies:** HTML5, CSS3, JavaScript
- **DataBases:** MySQL

Experience

Independent Project

Chat Application Developer

June 2024

- Developed a real-time web chat application using Python, Django, HTML, CSS, and JavaScript.
- Created a user authentication system for simple login functionality.
- Implemented real-time messaging features with timestamped messages, unread message count, and display of the latest message.
- Demonstrated advanced Django skills through efficient backend development and integration with frontend technologies.

Independent Project

E-commerce Website Developer

July 2024

- Designed and developed a comprehensive e-commerce website using Python, Django, JavaScript, HTML, and CSS.
- Implemented features such as user registration, authentication, logout, product display, add-to-cart functionality, and payment processing.
- Deployed the website online, making it accessible to users and demonstrating full-stack development capabilities.
- Enhanced the website based on user feedback, improving performance and user experience.

Certifications/Courses

Python and SQL (Intermediate Level)

SoloLearn

Demonstrated theoretical and practical understanding of Python and SQL through course completion.

Python for Everybody Specialization

Coursera (University of Michigan)

Completed a series of courses covering Python programming fundamentals, data structures, and web development.

Django for Everybody Specialization

Coursera (University of Michigan)

Mastered Django basics, data management, and full-stack web development through comprehensive coursework.

SQL for Data Science

Coursera (University of California, Davis)

Gained proficiency in SQL and database management, focusing on real-world data science applications.
