Professional Summary (Backend/Web Developer)

Backend Developer with 3 years of experience in Django. Skilled in building robust systems and web applications. Enthusiastic, proactive, and a collaborative team player, bringing adaptability and fresh perspective to dynamic teams.

Skills

- **Backend/Web Development:** Python, Django, Django REST Framework, Celery
- **Web Technologies:** HTML5, CSS3, Vue, JavaScript
- **Databases:** MySQL
- **Tools and Methodologies:** JIRA, Microsoft Teams, Azure

Experience

Fullstack Developer (Freelancer) | TDMeat — United States (June 2023 - October 2023)

- Designed and developed a web platform for managing orders and sales for a meat shop using **Django** and **SQL** for the backend and **React** for the frontend.
- Implemented a payment system allowing customers to make direct transactions with delivery personnel.
- Created customized dashboards for different roles (seller, butcher, and delivery) to facilitate sales management and tracking.

Fullstack Developer (Freelancer) | Private Client — Dominican Republic (January 2024 - July 2024)

- Developed two complementary platforms for the rooster enthusiasts community, enabling users to upload, view, and interact with videos.
- Implemented a **live streaming** feature with real-time comments to enhance user engagement.
- Utilized **Django** for the backend, **Bootstrap 5** for the frontend, and **SQLite** as the database, ensuring optimal performance.

Fullstack Developer | Nitza Development — United States (September 2024 - February 2025)

- Contributing to the development of a project for **TowitHouston**, a U.S.-based company specializing in trailer rental and sales.
- Focus on backend development using **Django**, optimizing database queries with tools like **Django Debug Toolbar**.
- Collaborate on frontend design tasks and adjustments using **Bootstrap 5** and **Svelte**, following the manager's directives.

Fullstack Developer | Pink Zebra — Remote (March 2025 – June 2025)

- Participated in the development of a platform for an eco-friendly fragrance product company, focusing on creating API endpoints using Django REST Framework and integrating them with a Vue-based frontend.
- Used Django ORM to simplify and optimize database queries.
- Collaborated with an agile development team and managed code changes, which were reviewed and deployed to Azure.

Certifications/Courses

1. Bachelor's Degree in Computer Science
